

## Claims

- [c1] That which is claimed is:
1. A securities system comprising:  
a system that has price instability alerts over a network.
  2. A system according to claim 1 in which said price instability alerts are static.
  3. A system according to claim 1 in which said price instability alerts are dynamic.
  4. A system according to claim 1 in which said price instability alerts are dynamic and static.
  5. A system according to claim 1 in which said system is a data processing system.
  6. A system according to claim 5 in which said system is processed in a client server system.
  7. A system according to claim 5 in which said system is connected to through the Internet.
  8. A system according to claim 5 in which said system is connected to wireless devices.

- [c9] 9. A system according to claim 5, further comprising: (a) computer processor means for processing data; (b) storage means for storing said data on a storage medium; (c) communication means for transmitting data in a secure environment to and from various remote locations; and (d) computer software means for creating and displaying trade data concerning a particular trade in the form of a trade record.
- [c10] 10. A system, as claimed in claim 9 wherein said computer software means further comprises: means for inputting and storing system information on said storage means.
- [c11] 11. A system according to claim 4 in which said system is a data processing system.
- [c12] 12. A system according to claim 11 in which said system is processed in a client server system.
- [c13] 13. A system according to claim 11 in which said system is connected to through the Internet.
- [c14] 14. A system according to claim 11 in which said system is connected to wireless devices.
- [c15] 15. A system according to claim 11, further comprising:

(a) computer processor means for processing data; (b) storage means for storing said data on a storage medium; (c) communication means for transmitting data in a secure environment to and from various remote locations; and (d) computer software means for creating and displaying trade data concerning a particular trade in the form of a trade record.

- [c16] 16. A system, as claimed in claim 15 wherein said computer software means further comprises: means for inputting and storing system information on said storage means.
- [c17] 17. A system according to claim 2 in which said system is a data processing system.
- [c18] 18. A system according to claim 3 in which said system is a data processing system.
- [c19] 19. A system according to claim 1 in which the trading of securities are done directly between rights holders.
- [c20] 20. A system according to claim 1 in which the system creates a static dynamic price instability alert and a separate dynamic price instability alert that senses the direction of the security and moves the price instability alert larger or smaller accordingly.

- [c21] 21. A system according to claim 1 in which the system moves an existing beneficial rights holder order book into a market auction after a price instability alert.
- [c22] 22. A system according to claim 1 which creates a random time element auction to last for a given period of time.
- [c23] 23, A system according to claim 1 which displays the beneficial rights holder in the order book during the auction bid and ask book creation.
